For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge: National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at:
www.nationalgrid.com or call 1-800-642-4272
Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

• **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

• **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

• **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

• **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

• **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit: A credit issued by the company in case of a prolonged electric service outage.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Merchant Function Charge: A charge for the Company's cost to procure gas or electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Electric Service

Delivery: National Grid's charges for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

SBC: These charges reflect costs associated with mandated public policy programs, such as Clean Energy Fund.

Revenue Decoupling Mechanism ("RDM"):

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism (ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

Choosing an Energy Supplier You can choose who supplies your energy. No matter which energy supplier you choose, National Grid will continue to deliver energy to you safely, efficiently and reliably. We will also continue to provide your customer service, including emergency response and storm restoration. National Grid is dedicated to creating an open energy market that lets you choose from a variety of competitive energy suppliers, who may offer different pricing options. For information on authorized energy suppliers and how to choose, please visit us online at ngrid.com/uny-energychoice

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at:
www.nationalgrid.com or call 1-800-642-4272
Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at:

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

• **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

• **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

• **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

• **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

• **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Schedule SL Reference No.: In consideration of a customer's request to partition their street lighting account, the Company provides a reference number to identify the corresponding customer specified equipment and associated charges. The Company is responsible for the accuracy of the total quantity of equipment within the bill account and not the accuracy of the equipment identified by a reference number. The customer may inform the Company in writing prior to the first day of any month for which they designate corrections/changes so as to appear in the next bill.

Location Charge: A fixed rate charge to cover costs associated with infrastructure equipment and administrative services specific to providing the unmetered energy delivery service to customer owned, operated and maintained traffic control equipment and as further defined within the applicable tariff.

Billing Credits

Paperless Billing Credit: Credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A credit issued by the company in the event of a prolonged service outage.

Energy Measurement Terms

KWh: The unit of electricity measured by your meter, kWh is an abbreviation for kilowatt-hour, or 1,000 watt-hours of electricity use. One kWh will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Notice About Electronic Check Conversion

By sending your completed, signed check to us, you authorize us to use the account information from your check to make an electronic fund transfer from your account for the same amount as the check. If the electronic fund transfer cannot be processed for technical reasons, you authorize us to process the copy of your check.

Electric Service

Delivery: National Grid's charges for bringing electricity from your supplier to your premise, regardless of supplier.

Merchant Function Charge: A charge to reflect the cost the Company incurs associated with the procurement of electricity supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

SBC: These charges reflect costs associated with mandated public policy programs, such as energy efficiency.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Estimating Your Usage

As an unmetered electric service, outdoor lighting and traffic controls utilize standard calculations to determine the energy usage during a given billing period.

Outdoor Lighting utilizes the total number of hours of dusk to dawn operation during the given bill period. The hours of operation are multiplied by the summed quantity of billable wattage (watts) for all lamps in service during the same bill period. The total is divided by 1,000 to result in the energy consumption in kWh. Adjustments are made to compensate for lights that have been requested to be temporarily disconnected or are operated continuously.

Traffic Controls utilize the customer specified wattage (or equipment specific default wattage) for all lamps and other associated equipment in service during the bill period multiplied by the applicable operational timing factor as defined within the applicable tariff. The summed quantity of wattage hours is divided by 1,000 to result in the energy consumption in kWh.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

• **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

• **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

• **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

• **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

• **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit: A credit issued by the company in case of a prolonged electric service outage.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Merchant Function Charge: A charge for the Company's cost to procure gas or electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Electric Service

Delivery: National Grid's charges for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

SBC: These charges reflect costs associated with mandated public policy programs, such as Clean Energy Fund.

Revenue Decoupling Mechanism ("RDM"):

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism (ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs.

Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

• **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

• **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

• **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

• **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

• **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit: A credit issued by the company in case of a prolonged electric service outage.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Merchant Function Charge: A charge for the Company's cost to procure gas or electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Electric Service

Delivery: National Grid's charges for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

SBC: These charges reflect costs associated with mandated public policy programs, such as Clean Energy Fund.

Revenue Decoupling Mechanism ("RDM"):

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism (ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs.

Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

• **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

• **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

• **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

• **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

• **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit: A credit issued by the company in case of a prolonged electric service outage.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Merchant Function Charge: A charge for the Company's cost to procure gas or electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Electric Service

Delivery: National Grid's charges for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

SBC: These charges reflect costs associated with mandated public policy programs, such as Clean Energy Fund.

Revenue Decoupling Mechanism ("RDM"):

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism (ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.

- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.

- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.

- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.

- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us. National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Energy Measurement Terms

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

CCF: The unit of gas volume (100 cubic feet) as measured by your meter.

Therm: A unit of heat content equal to 100,000 British Thermal Units (BTU). A BTU represents the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit. The number of CCFs is multiplied by a conversion factor to determine the therms used. The number of therms is used to determine the gas charges on your bill.

Gas Service

National Grid Gas Delivery Service Charge:

National Grid's charges for transporting gas across its distribution system to your premise, regardless of supplier.

Adjustment for changes from normal weather: A mechanism that adjusts customers' gas bills due to variations from normal weather during the heating months, October through May.

Gas Supply: A charge to reflect the Company's actual cost to purchase gas from suppliers and transporting the gas to the Company's distribution system. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Merchant Function Charge: A charge to reflect the costs the Company incurs associated with the procurement of gas supply. This charge will not be billed to you by the Company if you choose an alternate supplier.

Delivery Service Adjustment: A collection of surcharges and credits consisting of Net Revenue Sharing Adjustment, Research & Development Surcharge, Revenue Decoupling Mechanism, Gas Safety & Reliability Surcharge, Earnings Adjustment Mechanism, Net Utility Plant & Depreciation Expense Reconciliation, Incremental Energy Efficiency Surcharge, Non-Pipe Alternatives Cost Recovery, Late Payment Charge & Other Waived Fees and Arrears Management Program.

Estimating Your Usage

We will estimate your usage any time we are unable to obtain a reading. We base our estimate, generally, on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated readings and actual usage will be reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.

For more information, visit us at: www.nationalgrid.com or call 1-800-642-4272. Customers with problems paying their National Grid bill should call 1-800-443-1837.

For Your Information

We want you to easily understand your bill, the terms we use and the charges that appear. Following is a brief explanation of items that appear on your bill, as well as payment programs and billing services we offer. If you have questions or want more detailed explanations, please visit our website at www.nationalgrid.com or call 1-800-642-4272.

Paying Your Bill/ Payment Options

- **DirectPay:** If you choose, National Grid will automatically withdraw your monthly bill payment from your checking or savings account. You will avoid the inconvenience of check writing, stamps, mailing and due dates. Your service bill will indicate your energy usage and the date of your next automatic withdrawal.
- **By Mail:** Send us your payment in the envelope provided with your bill. For your protection, please do not send cash. Put your 10-digit account number on your check or money order and include your bill stub. Please do not staple or paper clip your check to the stub.
- **In Person:** Pay at an authorized payment location by cash or check. Please bring your bill with you. Most locations charge a fee for providing this service. For the payment locations nearest you, visit our website or contact us.
- **Online:** Enroll online to receive and pay your bill online. The online function will begin with the next billing cycle following your enrollment.
- **Late Payment Charge:** To avoid Late Payment Charges, your payment must be received by the date shown on the front of the bill.

Charges

Charges for electric or gas service are based on rates or prices approved by the New York State Public Service Commission (PSC). When changes in prices are approved by the PSC, information will be included with your bill. Complete price schedules are available on our website or by contacting us.

National Grid reserves the right to upwardly adjust a previously issued bill or back bill.

Basic Service: A charge to cover costs for meter reading, billing, equipment and maintenance. This charge is the same regardless of how much energy is used during the billing period.

Tariff Surcharge: New York State and many local municipalities impose taxes on National Grid's revenue. These operating costs are recovered through a tariff surcharge applied to all rates and charges and may vary among taxing municipalities within the National Grid system area.

Sales Tax: In some areas National Grid is required to collect state and local sales taxes. Some school districts also impose taxes.

Billing Credits

Paperless Billing Credit: A credit provided to Customers who elect to receive their bills electronically through the Company's Online Bill-Pay Program.

Outage Credit : A Credit issued by the company in the event of a prolonged electric service outage.

Energy Measurement Terms

kWh: The unit of electricity usage measured by your meter. One kilowatt-hour (kWh) is 1000 watts-hours, and will light a 100-watt bulb for 10 hours. The number of kWhs is used to determine the electricity charges on your bill.

Meter Multiplier: Due to their design, some meters record a fraction of the total usage. The multiplier is used to convert the recorded meter reading on these types of meters to total actual consumption.

Electric Service

Delivery: National Grid's charge for bringing electricity from your supplier to your premise, regardless of supplier. Included, when applicable, are the following surcharges: Earnings Adjustment Mechanism, Dynamic Load Management, Non-Wires Alternative, Net Utility Plant and Depreciation Expense Surcharge, Incremental New Efficiency: New York Costs Surcharge, Value of Delivery Energy Resources and Arrears Management Program Recovery Surcharge, Electric Vehicle Make-Ready Surcharge, Energy Storage Surcharge, Statement of Late Payment Charges and Other Fees.

Legacy Transition Charge (LTC): All delivery service customers are billed the cost or benefit of electricity supply contracts the Company entered prior to June 1, 2001. Residential customers also receive the benefit of low cost hydropower.

Customer Benefit Contribution (CBC): Monthly \$/kW DC installed-capacity charge assessed to customers that install eligible generation assets after January 1, 2022 intended to collect certain public benefit program costs from these customers.

Merchant Function Charge: A charge for the Company's cost to procure electricity supply. The Company will not bill you this charge if you choose an alternate supplier.

Capacity Tag: Your adjusted electricity demand at the hour of the New York Control Area peak load in the most recent 12 month period ending May 1.

SBC: These charges reflect costs associated with mandated public policy programs, such as the Clean Energy Fund.

Clean Energy Delivery : Charges associated with Clean Energy Standard program costs.

Revenue Decoupling Mechanism ("RDM") –

Reconciles actual billed delivery service revenues to annual target revenues. Delivery service revenues above target are refunded to customers. Target revenues above actual delivery service revenues are collected from customers.

Transmission Revenue Adjustment: Reconciles wholesale transmission service revenue to the forecasted transmission service revenue embedded in electric delivery rates. Transmission service revenues above those forecasted are credited to customers. Forecast revenues above actual revenues are collected from customers.

SBC Exemption: A credit provided to Customers who are not subject to the SBC.

Electricity Supply: The price of electricity supply used during the billing period. If you choose an alternate supplier, the price will be what you agree upon with that supplier.

Electricity Supply Reconciliation Mechanism

(ESRM): Reconciles National Grid's electricity supply service revenues to the cost of Company purchased electricity, including Clean Energy Standard costs. Costs above revenues are recovered from customers. Revenues above costs are credited to customers.

Estimating Your Usage

When we are unable to obtain a reading, we estimate your usage based on your past usage, taking current weather conditions into account. Because our meters keep a continuous record of usage, any difference between estimated and actual usage is reconciled with the next meter reading. To avoid estimated readings, you can take your own reading on or just before the scheduled date shown on your bill and call it in at 1-888-932-0301.
